

The Department of Physics at the U.S. Naval Postgraduate School is seeking applicants for research faculty positions:

Research Professor in Remote Sensing and Imagery Processing. Qualified candidates must have a Ph.D. in Physics, Geophysics, or related field plus a demonstrated record of research in remote sensing, particularly Hyperspectral imagery, algorithms and software development. The successful candidate is expected to develop a research program and education courses in collaboration with NPS faculty and potentially other scientists in these topics. Continued collaboration in such projects is dependent on renewal of year-to-year funding.

Salary will be commensurate with the experience of the successful candidates. Applicants should submit a CV and a statement of research interests and capabilities. Reviews of the applications will begin immediately. Further inquiries and applications should be sent to:

Professor RC Olsen
