

Combat Systems - Total Ship Systems (5705)**Core Skill Requirements****DUTIES**

The Engineering and Technology (Combat Systems-Total Ship) subspecialty code (5705) will provide a command with an officer possessing a technical background in Combat Systems. In addition to the Combat Systems core disciplines, the officer will have a broad-based, design oriented educational background focusing on the warship as a total engineering system including hull, mechanical, electrical, and combat systems. Specific capabilities/requirements generally include:

The ability to identify, formulate, and solve engineering and/or technical problems, including competence in research, design, development, procurement, operation and or maintenance in scientific and/or technical engineering fields. This would include the ability to prepare technical and/or operational briefings, project plans, and reports.

The ability to understand the impact of combat systems and engineering and/or technical solutions in a global context, and interact with personnel from industry, laboratories, academic institutions and/or other services regarding combat system design, maintenance, and operation.

The ability to use techniques, skills, and modern engineering tools for combat systems, including the ability to analyze and interpret data, and develop policy and procedures through the entire spectrum of operation for platform combat systems.

The ability to apply knowledge acquired in academic disciplines specifically to the design, procurement, maintenance and operation of weapons, ships, boats and craft.

REPRESENTATIVE BILLETS**REQUIREMENTS**

This subspecialty code can be earned through successful completion of graduate level education in the discipline of Combat Systems and will meet all applicable ESRs through the completion of the Combat Systems - Total Ship Systems Engineering (TSSE) Track curriculum at NPS. Level of graduate study will determine approval of P (Masters level), N (Engineer's degree) or D (Doctorate level) coding.
