\* \* \* \* \*

b. **Exceptions.** For a subaward to conduct basic or applied scientific research with a nonprofit institution of higher education or nonprofit organization whose primary purpose is conducting scientific research, you must include terms and conditions in that subaward that allow the title to all equipment and supplies acquired under that subaward and charged as direct costs to the project or program to vest with the subrecipient upon acquisition subject only to the following three conditions related to equipment:

i. The subrecipient uses the equipment for the authorized purposes of the project or program until the property is no longer needed for those purposes.

ii. The subrecipient manages the equipment as provided in PROP Article II of these general terms and conditions. This includes maintaining property records that include the percentage representing the Federal share of total project costs under the award to you (the recipient) under which the subrecipient acquired the exempt property, so that the subrecipient may deduct the Federal share if it wishes to use the property in future contributions for cost sharing or matching purposes on Federal awards. When both your award with the DoD Component has cost sharing requirements and your subaward allows for the purchase of exempt property, you must include in that subaward the percentage representing the Federal share of total project costs to enable the subrecipient’s compliance with this provision.

iii. FLC San Diego reserves the right to transfer title to the equipment to another entity if the Principal Investigator of a subrecipient relocates his or her research program to that entity. If FLC San Diego elects to exercise its right to transfer the title of equipment, FLC San Diego will contact the recipient to discuss the transfer.

You must not begin performance of research within the scope of “The NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines)” until you receive notice from the grants officer that NPS has reviewed and accepted your documentation. In order for NPS to accomplish that review, you must provide the grants officer, generally as part of your original proposal prior to award, sufficient documentation to enable the review that includes:

- a. A written statement that your entity is in compliance with NIH Guidelines. This statement should be made by an official of the institution other than the Principal Investigator and should be on university or company letterhead.
- b. Evidence demonstrating that your proposed research protocol has been approved by an Institutional Biosafety Committee (IBC); and a copy of the Department of Health and Human Services (DHHS) Letter of Approval of the IBC, or the most recent letter from DHHS stating the IBC is in compliance with the NIH Guidelines.

You will not receive a separate approval for your proposed rDNA research. If you received the award based on a proposal including the two aforementioned items, you can assume the grants officer has accepted that documentation. If you add rDNA research later, you will have to provide the two items of documentation listed above and a revised proposal. If the rDNA research is approved, you will receive a modification incorporating the revised proposal.
